

# Meeting the mark in metal

**ODS**

**klöckner & co** multi metal distribution

**metal & more**

*"Combining the best of proven quality and innovative entrepreneurship"*

ODS is able to optimally manage every step of the logistics process. With in excess of 98% of all transactions being of the right amount of the right material, arriving at the right place at the right time we have an enviable record - and we aim to improve this yet further.

**Complicated operation**

Considering the scale at which ODS operates, logistics is a complicated operation. A flow of goods totalling several hundred thousands of tonnes is processed each year. Thousands of clients, of all varieties, ensure that our own and contracted trucks (around a hundred in total) deliver shipments to approximately a thousand addresses every day! Naturally, it is only possible to manage all of this properly when you have a well-functioning, flexible organisation with dedicated employees.

**Fast and on-time**

While fast and on-time delivery is

obviously a commercial trump card, it also reflects the generally prevailing attitude and commitment that guides everything we do at ODS: "We do what we promise!" This does, however, depend on having the right accessibility to the right resources. That's why we have four state-of-the-art warehouses strategically spread throughout the country at Barendrecht, Amsterdam, Almelo and Ridderkerk. These warehouses are partially equipped with computerised storage systems and offer possibilities for climate-controlled storage. The foundation for good logistics is further enhanced by a tailor-made and highly advanced computer system.
